Hi [REDACTED]

[REDACTED] may already have emailed you to request a further extension of time to complete the Scoping Opinion for you. I can only apologise for the delay associated with this.

To respond to a request for information regarding this site I had the opportunity of reading in more detail your scoping report and looking at the history of the site. Given the 'green' permitted working area of the site had been worked out, restored and at some point subsequently built on in part for agricultural purposes, mainly before the requirement to identify Phase 1 and 2 sites came into force under the provisions of the Environment Act 1995, I was surprised that the 'blue' area was included as a dormant site and for which you are now submitting details for working under the provisions of the condition.

Irrespective, I attach for information the views received so far from the following bodies:

Plumbland PC  
Northern Gas  
NATS  
CCC Highways  
CCC Historic Environment  
Allerdale BC – Planning  
Allerdale BC EHO  
Aspatria TC  
Gilcrux PC  
CCC Ecology  
Northern Gas

It is not apparent that we have received the responses of the EA to date unless [REDACTED] has received them and not saved them to the relevant file to date.

[REDACTED] please copy all further emails on this matter to my replacement [REDACTED]

Thanks [REDACTED]

Regards

[REDACTED]
